presents

Our Expanding Universe and other Theological Anomalies

a free public presentation by

Mr. George McKay

George McKay has 40 years experience as an aerospace engineer. 13 years ago one of his interests, Biblical History, became an avocation when he began researching Old Testament events. His objective is to verify the history and science that is included in these Biblical accounts. He has organized the results of his research into a manuscript that includes rigorous historical assessments of these events with extensive bibliographic references. In his presentation, George will continue to enlighten us on Biblical accounts of events that deal with Creation through Joshua's conquest. Back by popular demand!
